

*Winter 2018*

# Curbside Recycling

The recent winter weather has left our region dealing with delayed service and, in some cases, cancelled service. We appreciate the patience of our residents as collection services return to normal schedules.

Between the weather delays/cancellations and the recent holidays, many residents will have more recyclable materials than normal. Our collection contractor is prepared to handle the collection of overflow recyclable materials.

Here are some guidelines for preparing overflow recyclables for collection:

- Place extra loose material in boxes, paper bags, or containers — place these at least a foot away from the recycling cart.
- Place flattened cardboard on top of the cart, just under the lid.
- If absolutely necessary and there are no other options, residents may place loose materials in CLEAR garbage bags.
